MegaTest Flexi™ Automotive ECU/Sensor Test Lead Kit Part Number: ASLK100V3

Male/Female 'Y' Leads with rubber protection for the male terminal

- Engineered in the USA.
- Quick reference guide included.
- Features Y-style test wires with combined male and female leads.
- Wide range of connection leads for quick and easy diagnosis of faults on most sensors/ valves/ solenoids/ actuators/ injectors/ starter circuit/ ignition coil, etc. Covers many makes and models.
- Includes proprietary "Y-style" leads for quick connections of meters or scopes.
- No using time-consuming straight-through leads to make up wiring harnesses. A huge time saving feature.
- Y-style leads can accommodate even the most unusual sensor applications.
- Contains sizes not found in any other kit, for more comprehensive vehicle coverage.
- Includes 10K potentiometer for simulating sensor loads, or for modifying circuit resistance.
- Also includes proprietary fuse test adapters and stackable banana jack leads for easy connection of multiple test instruments or circuits, and especially useful when using oscilloscopes.
- Includes "needle style" probes for back-probing connectors to determine connector integrity, or for probing signals on large, multi-pin connectors.
- Dramatically reduces setup and diagnostic time for electrical/electronic troubleshooting.
- Comes in a handy ABS case for organisation and tidiness.
