

Self-Adjusting Ratcheting Pliers

- Spring-loaded ratcheting cams - located in the jaws, they allow the tool to ratchet while it's locked onto a bolt
- Originally sold as Ratch n Lock pliers in very large quantities. That patent has been acquired
- Self-Adjusting Jaws can grip various bolt head shapes and sizes
- Release the jaws by switch
- One-handed locking mechanism effortless operation allows members to lock or clamp onto various objects, leaving their other hand free
- Ergonomically designed, oil-resistant rubber over-mold handles provide a comfortable grip
- Long-lasting steel construction with durable ABS plastic handle
