## **TOOLS & EQUIPMENT COMPANY**

### **Tight-Area Power Tool Adapter**

- Great for accessing tight spaces.
  - Proprietary gear design allows use of a power tool to drive nuts.
  - Power the adaptor either with a 19mm socket or a 1/4" bit driver.
  - Sockets to fit the appropriate fastener size.
  - Low-profile pass-through sockets reduce from 19mm to the size of the fastener being worked on.
  - Suitable for applications up to 180Nm/ 130 Ft-lbs.
  - Allows you to loosen and tighten fasteners in tight places with a power tool, previously only accessible with a hand tool.
  - The internal gear structure transmits the power from the driver to the fastener.
