### FlowStop Universal Flow Stop Kit

The FlowStop Universal Flow Stop Kit is a reusable system to keep fluids in and dirt & dust out of maintenance systems; maintaining a clean and safe workshop environment.

- Ideal for use when flaring brake lines.
- Silicone free rubber material is highly resistant to many chemicals, acids and other aggressive fluids.
- Available in a standard and heavy-duty kit.
- Temperature Range: -25°C to +90°C
- Suitable for non-pressurised systems only.

#### Application Examples:

- Brake system maintenance:
  - Brake discs & pads
  - Brake calipers
- Injector repair / replacement etc.
